Biofuel

Biofuel is a type of combustible liquid derived from biological sources, such as plants, animals, or minerals. Biofuels are renewable and can be used to replace or supplement traditional fossil fuels, such as gasoline, diesel and heating oil. Common types of biofuels include biodiesel, ethanol, and biogas. Biofuels are produced through a variety of processes, including fermentation, pyrolysis, and gasification.

The most common type of renewable fuel compatible with residential heating tanks is biodiesel. Biodiesel is a renewable combustible liquid made from vegetable oils, animal fats, or recycled cooking grease. It is a clean burning combustible that can be used in any diesel engine or oil-fired burner with little or no modifications.

Biofuel is increasingly being used for heating buildings in North America.

Biofuel has many advantages when it comes to heating products. Biofuel is a renewable energy source, meaning it can be replenished quickly and is not a finite resource like fossil fuels. It is also a clean burning fuel, meaning it produces less emissions than traditional fossil fuels. Finally, biofuel is a versatile combustible, meaning it can be used in a variety of heating products.

Biofuel is compatible with Granby fuel oil storage tanks. Granby Industries offers a range of steel tanks that are designed to be used with biofuel. These tanks have been tested to ensure that they are safe for use with biofuel. Additionally, Granby Industries offers a range of accessories and components that are designed to be used with biofuel.

The industry benchmark.

The strongest and most reliable tanks you can buy.

A LOGICAL AND RESPONSIBLE CHOICE

SAFETY AND RELIABILITY

Granby Industries offers the most complete line of oil tanks with secondary containment systems.

Whether it be our ECOPLUS and ECOGARD double-bottom tanks or our 2-in-1 tanks with a 110% secondary containment, you will not find safer and more reliable oil tanks on the market.

GUARANTEED DURABILITY

Granby Industries offers oil tanks made of non-corrosive material such as our fiberglass tanks and HDPE lined 2-in-1 tanks.

GREAT WARRANTIES

Warranty of up to 30 years.

PEACE OF MIND

With 70 years of experience, Granby Industries is known for its quality and proven track record in innovation and design.

Light commercial Stationary tanks

At Granby Industries, we are committed to delivering innovative and high-quality solutions for your fuel storage needs. Our Light Commercial Tanks are a testament to this commitment, offering a range of benefits that set them apart as the preferred choice for various applications.

HERE ARE SOME KEY ADVANTAGES OF OUR LIGHT COMMERCIAL TANKS:

ROBUST SKID DESIGN FOR EASY HANDLING

Designed with practicality in mind, our tanks feature a robust skid design that ensures easy handling and installation. You will appreciate the convenience of transporting and placing our tanks with ease.

MORE COMPACT DESIGN

Space constraints are a common challenge, especially in commercial environments. Our tanks feature a more compact design, allowing you to maximize storage capacity while minimizing the footprint. This means you can store more fuel in less space.

SAME OPENING PATTERN ON SINGLE WALL (SW) AND DOUBLE WALL (DW)

Flexibility is crucial when it comes to fuel storage solutions. Our tanks feature the same opening pattern on both Single Wall (SW) and Double Wall (DW) models, ensuring interchangeability and convenience for your specific requirements.

OPENINGS ACCESSIBLE ON BOTH ENDS

Convenience is key, and our tanks offer accessibility from both ends. This dual-opening feature simplifies installation and maintenance, saving you time and effort.

BUILT-IN VISUAL MONITORING (EASY LEAK DETECTION) ON DOUBLE WALL (DW) TANKS

Safety and peace of mind are paramount. With built-in visual monitoring, our tanks make leak detection a breeze. Keeping an eye on your fuel levels has never been easier, allowing you to take prompt action if an issue arises.

DURABLE POWDER PAINT

Our tanks are not only functional but also aesthetically pleasing. The durable powder paint finish not only enhances the tank's visual appeal but also provides an added layer of protection against environmental elements, ensuring longevity and durability.
