

NEW

Watts Series HPX

Boiler Trim Packages

Includes

- 1/8" DuoVent Float Vent
- 1/8" and 1/2" SCV
- 1" or 1 1/4" AS
- 1/2" ETX-30 or 1/2" ETX-15
- 1/2" B911S

The Best Way to Simplify Your Next Boiler Installation with Quality Components from Watts!

Convenient

The easy to carry HPX package contains the essential trim components of a quality boiler installation in a single box

Components

The new HP package contains quality Watts components ... including the Air Separator and the B911S Combination Bronze Fill Valve and Backflow Preventer.

Quality

Provide your customers with a quality installation using hydronic components you know you can depend on heating season after heating season.

Plus

We have included something EXTRA ...
the new Watts Model SCV Service Check Valves!

These valves facilitate inspection of system components while maintaining system integrity. The spring loaded valve closes as the component is removed from the system, eliminating the necessity of draining the system.

The next time you are preparing for a hot water boiler installation, why not keep it simple? Pick up the new HPX Hydronic Package from Watts ... the name you trust for quality, reliability and durability.

In fact, pick up a few HPX packages! They are not only convenient for installation but they will also come in handy on those emergency repair jobs. You will have every essential boiler component in one place, one box ... not all over your truck!
