

## V8043 5000 Series Zone Valve

Resideo 5000 Series Zone Valves feature a patented ball seal design that provides a new sealing surface each time the valve closes, dramatically extending life expectancy of the valve.

In fact, tests show they last twice as long as competitive valves. In the event of a service call, the valve seal and ball plug are easily accessed for “in-situ” service (no cutting or refitting required). Add in the easy installation, “slow return” motor and “Quick Fit” pushbutton actuator, and the bottom line is that the 5000 Series Zone Valves are a contractor’s dream.

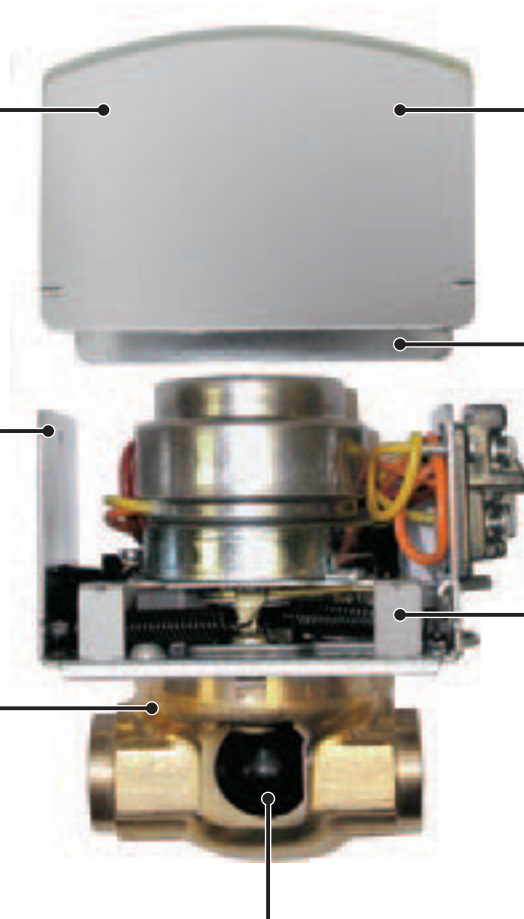

# V8043 5000 Series Zone Valve

The ultimate in zone valve technology and reliability

**Built-In Quality** by retaining all the great performance and reliability of the original V8043 with improved features

**Innovative Motor Technology** for silent motor and system operation to reduce customer complaints or callbacks

**“Quick Fit” Pushbutton Actuator** removal feature offers robust metal-to-metal connection, unlike the weak plastic used by other brands

**Updated Styling** for a sleeker, more modern look

**Built On Resideo Tradition** for compatibility with a full range of thermostats

**Easily Serviceable And Upgradeable** because there's no need to remove the valve from the pipe to change or replace the inside parts

**Patented Ball Seal Design** provides a new sealing surface each time the valve operates, producing a quality seal and significantly increasing service life
